

License Agreement Version 003 for Animated-CAD ("Ani-CAD"), effective as of October 7, 2020, updated on September 03, 2026

(english translation)

1: Scope

1.1. This is a contract between you, as the licensee, and the following licensor:

Animated-CAD Engineering, owned by Benedikt Sessler

In der Grub 7

D-78343 Gaienhofen

Phone: 0151 25118245

Mail: bsessler@animated-cad.com

1.2 The Software includes the computer software, the accompanying media, and the documentation provided. The term "Software" as used in this Agreement also includes all improved and modified versions of the Software that the Licensor makes available to the Licensee-including subsequently and, where applicable, free of charge.

1.3 This License Agreement constitutes the complete and exclusive agreement between the Licensor and the Licensee regarding this Software. This License Agreement supersedes all prior negotiations, transactions, and agreements between the Licensor and the Licensee regarding this Software, unless otherwise expressly stated in this License Agreement.

1.4 Agreements regarding activations or other program enhancements to the software are not affected by Section 1.3.

2: License Scope, Activation

2.1 This license permits the Licensee to install the free version of the software on a computer system for a single user.

2.2 The Licensee acknowledges that this is a non-exclusive license. The Licensor is and remains the owner of all titles, rights, and similar tangible and intangible assets related to this software and this software [underlying technologies](#).

2.3 Exclusion of Multiple Use: Authorization for use beyond the free version of the software is technically tied to the computer system on which the program is installed and to the user of the program.

2.4 The free versions and, in some cases, certain other versions are limited in terms of the size of the circuit to be analyzed and the scope of the analysis parameters, ([Note on this](#)).

3: Reproduction, Distribution, Backup Copies

3.1 The Licensee may not make copies of the Software or permit others to make copies of the Software, unless expressly authorized by this License Agreement or by law.

3.2 The Licensee may make one copy of the Software for its own backup purposes. The backup copy must be clearly and permanently labeled as a backup copy of the Software and must be stored in a manner that prevents access by third parties.

3.3 The Licensee may not distribute the Software or copies of the Software (in particular, rent or lend them) or publicly perform the Software. In particular, the Licensee may not transmit or distribute the Software via the Internet or a comparable network.

3.4 The Licensee may not enable or permit third parties to use the software via connected computer systems, in particular via an internal network or the Internet. This is permitted only in exceptional cases if all persons and all individual computer systems that can access the software via the internal network or via a section of the Internet specifically secured by the Licensee each have their own license that is valid at all times during use and [unrestricted full version](#) of the software and have agreed to this license agreement. The operator of the connected computing system bears the responsibility and the burden of proof that all participants meet the aforementioned access requirements.

3.5 Notwithstanding the foregoing, no copies of the software that have been modified in violation of Section 4 or applicable laws, or for which there is at least reasonable suspicion of such modification, may be copied, distributed, published, or made available. In particular, no modified software may be distributed commercially or publicly.

4: Prohibited Modifications, Protective Measures

4.1 The Licensee agrees to refrain from modifying the Software unless such modification is expressly permitted in this License Agreement or by the applicable laws governing this License Agreement.

In particular, the Licensee shall refrain from the following:

- Modifying this license agreement
- Modifying the documentation, unless authorized by this license agreement. The documentation may only be modified to explain the program's functionality and to provide training in the use of the program.
- "Reverse engineering" and the use of comparable methods to derive the source code of this software, unless this is expressly permitted by law, in particular under §69e of the German Copyright Act (UrhG). In this case, subsection 4.4 must be observed in particular.
- Modification or circumvention of those restrictions or activations that can be removed or relaxed upon payment, in particular the technical restriction designed to prevent multiple use as described in Section 2.3
- Modifying or obscuring the legal notices in the software, in particular the Ani-CAD logos, the Ani-CAD icons, the name of the software, and the licensor's name.
- Modifications of any kind that are intended to redistribute the program under a different name or for another purpose.

4.2 The Licensee acknowledges that the Program contains technical protection measures designed to make it difficult to modify the source code and shall refrain from any attempt to modify or circumvent these measures.

4.3 The Licensee acknowledges that the Program contains technical protection measures to detect modifications to the software and, in the event of a detected modification, to forward information to the appropriate authorities; the Licensee consents to the Licensor's use of these measures and shall refrain from any attempt to modify or circumvent them. The Licensor warrants to the Licensee that the protective measures will not collect or transmit any data other than that necessary for these protective measures, and that data will only be transmitted at all in the event of reasonable suspicion.

4.4 If the Licensee identifies a legally permissible reason for modifying the program code and wishes to make such a modification, the Licensee must notify the Licensor of the reason, along with a technical description-as detailed as possible-of the potential cause of the error and the planned implementation. The Licensor must be given a reasonable period of time to review the notification and must be given priority in implementing the modification to the software. Only if the Licensor is unable or unwilling to make a legally permissible modification may the Licensee implement such a modification. The Licensee bears the burden of proof and responsibility for ensuring that any modification implemented by him is legally permissible.

5: Permitted Modifications

5.1 The component libraries in the '.alib' file format that may be included with the software, and any schematic files that may be included, are merely non-binding suggestions for use with the software. These files are exempt from the prohibitions listed in Section 4. ([Explanation](#))

5.2 Section 6 also applies to these files, to the extent that it is applicable to them.

6: Liability

6.1 This software is NOT approved for use with critical systems ([Explanation](#)) . It must not be used in connection with critical systems.

6.2 The Licensee acknowledges that software designed to calculate and display physical quantities merely represents-or can only represent-a model of real-world conditions. The Licensee is solely responsible for determining the actual conditions in a timely and careful manner-for example, through its own measurements or analysis-in order to protect itself, the Licensor, and third parties from harm.

6.3 The Licensor is not liable for any external programs that may interact with the Software. External programs are those programs or software components that are not part of this Software and over whose development and further development the Licensor has no influence, or at least no decisive influence; in particular, the programs named "NGspice" and "FFmpeg." ([Explanation](#))

6.4 The Licensee solely is responsible for ensuring that its use or distribution of products created, modified, or distributed in connection with this software does not infringe the intellectual property rights of third parties. The Licensee agrees to defend and indemnify the Licensor and to hold the Licensor harmless from all claims, losses, damages, lawsuits, or expenses associated with or resulting from the Licensee's business operations.

6.5 The Licensee must immediately notify the Licensor of any defects that arise. An email to the above-mentioned email address is sufficient for this purpose.

7: Term of the Agreement

7.1 This License Agreement shall take effect upon the Licensee's confirmation that they have read and understood this Agreement and agree to its terms. It is valid without signatures.

7.2 This License Agreement is valid indefinitely, unless it is terminated in accordance with the terms of this License Agreement. Upon termination of this License, the Licensee's right to use this software shall also terminate.

7.3 For versions of the software intended exclusively for educational use, the license automatically terminates as soon as the Licensee is no longer part of the educational institution. ([Explanation](#))

7.4 If a fixed term or a specific expiration date has been agreed upon, the agreement automatically terminates at the end of the term or on the expiration date.

7.4a If an agreement is entered into between the Licensors and the Licensee using a newer version of this License Agreement, the older version is replaced by the newer version.

7.5 In the event of a breach of these terms by the Licensee, the Licensors have the right to terminate this License Agreement. This does not preclude any further steps to pursue the license violation.

7.6 In the event of a breach by the Licensee of the provisions of this License Agreement, the Licensee has the right to terminate the License Agreement. In accordance with Section 7.7, the Licensee shall destroy all copies of the software or return them to the Licensors. The Licensee shall send the Licensors a statement confirming that all copies have been destroyed or returned, along with a description of the breach. At the Licensors' discretion, the Licensors shall either send the Licensee a version of the software that remedies the breach at the Licensors' expense or refund the purchase price in full.

7.7 Upon termination of the license, the Licensee agrees to return all copies of the software to the Licensors or to destroy them.
